

INTRODUCING

CAN-ROSS ENVIRODRAIN™ FILTER

Drain rainwater from your Spill Berm while filtering out hydrocarbons

Can-Ross Environmental offers a safe and effective way to allow rainwater to drain out of your spill berm during outdoor secondary containment applications. The EnviroDrain™ Filter will filter out harmful hydrocarbons such as gasoline, diesel fuel, and other oils while allowing rain water to pass through easily.

The EnviroDrain™ Filter comes complete with a 1/2" male adapter and can be matched with a 1/2" female plug that can be installed on any Can-Ross Spill Berm. The EnviroDrain™ Filter can be shut off when not in use or when replacing filter contents. The material contained within the filter can be replaced after a release has occurred. The EnviroDrain™ has a 12 oz. sorbent capacity.

Product Code	Product Description	Size	Weight
CRSB-EDF	Can-Ross Spill Berm EnviroDrain™ Filter	22"L x 8"W x 4"H	3 lbs.
